Historical note

A joint project of the United States Department of Agriculture (USDA), the U.S. Bureau of the Census, and the Iowa State University Statistical Laboratory in which a national area sample of agriculture was developed. Initiated in 1938, the project continued through 1944 in time for the 1945 Census of Agriculture. For more background information on the Master Sample of Agriculture, see the report by Wayne Fuller.

Collection description

This collection (1938-1944, n.d.) includes county maps accompanied by count units giving their size measures. These maps and statistical data sheets make up the content of each envelope (unless otherwise noted). Of the three original sets, this is probably the only one still in existence.

Organization

The envelopes are arranged alphabetically by state and within each state alphabetically by county.
