

Journal Cancellation List Selection Criteria

1. The Journal Cancellation List includes titles (both print and electronic) that were selected for cancellation by subject librarians responsible for each discipline
2. The primary selection criterion was based on usage and cost when data was available
3. Decisions were further influenced by the following criteria and considerations:
 - Subject area scope (e.g., does the subject area support the current research and teaching scope of the academic discipline)
 - Duplication of subject coverage by other disciplinary journals held by the ISU Library
 - Rankings by the Institute of Scientific Information (i.e., Science Citation Index, Social Sciences Index, and Arts and Humanities Citation Index)
 - Status of peer review and journal reputation
 - Coverage by major indexes for the disciplines
